

## Electrolyzed Water: An Innovative, Sustainable Approach to Safer Cleaning in Healthcare Environments

We have been operating for far too long on the myth that toxic cleaning products are the only combatant for viruses, bacteria, and pathogens in healthcare environments. In fact, these chemicals can result in bacterial resistance and superbugs, and worse, can cause respiratory issues, cancer, and a host of health problems for healthcare staff and patients. Electrolyzed water is a non-toxic and sustainable solution, offering a safer, yet powerful alternative for cleaning and disinfecting our healthcare environments.

### Program Fee:

- FREE for FAHQ, AzAHQ, GAHQ, MAHQ, NEAHQ, NCAHQ, OAHQ, and OrAHQ Members

- New England Association for Healthcare Quality
- North Carolina Association for Healthcare Quality
- Ohio Association for Healthcare Quality
- Oregon Association for Healthcare Quality

**Speaker:** Daniel Lawson  
Co-Founder and President of  
Business Solutions  
Viking Pure Solutions  
Port Orange, Florida

Daniel Lawson spent over a decade in the medical device industry and was fortunate to affiliate with some of the smartest executives and patient care providers in the world. Those relationships and access provided him with unparalleled insight into the intricacies of our health care environment and some of the biggest needs yet to be addressed. He was then fortunate to partner with now co-executive team at Viking Pure Solutions to introduce a disruptive, and patent protected, technology to the infection control space that will change the world. Dan wakes up every day with a passion to create a safer future for our families, friends, and associates. He is dedicated to creating a movement to remove toxic chemicals from the environment and to challenge the status-quo of what it means to truly clean and disinfect safely and effectively.

Please go to our [Webinar Page](#) on the FAHQ Website for more information on this and other FAHQ/HQC webinars.
