This event is approved by NAHQ for 1.0 hours of CPHQ CE credit

Description: Addressing high rates of severe maternal morbidity (SMM) and maternal mortality is a priority for the State of Arizona. SMM related to hypertensive disorders of pregnancy can lead to immediate and/or long-term consequences, including stroke and cardiomyopathy. Arizona data demonstrate that there are disparities in care and outcomes. Ms. Buchda will discuss how the implementation of evidence-based interventions using collaborative approaches can improve care and reduce disparities.

Objectives:

1. Explain what safety bundles are and how they improve care and reduce disparities
2. List the 5 “Rs” included in the AIM bundles
3. Identify data elements used to measure progress
4. Verbalize next steps for the AIM initiative

SPEAKER: Vicki Buchda, MS, RN, NEA-BC | Vice President of Care Improvement | Arizona Hospital and Healthcare Association

She is a highly skilled professional with demonstrated expertise in clinical and system leadership. Vicki is passionate about harm prevention, including harm from opioids, maternal health, advance care planning, health equity and the workforce.
